

# Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

## REPORT INFORMATION:

1999 Balicki, J., E.B. O'Brien, and R. Yamin  
Main Street in "Coney", a Study in Landscape Archeology Data Recovery - Maryland Route 36, Lonaconing, Allegany County, Maryland.  
Submitted to the Maryland State Highway Administration

Library ID No: 00007677 Catalog/Shelving ID: AG 58

## Research Firm/Institution:

John Milner Associates, Inc.  
5250 Cherokee Avenue  
Alexandria, VA 22312

## Sites examined:

18AG215

NRHP Eligible: ☒

[Justification](#)

## Project Details:

Phase I

Phase II

Phase III

### Project Justification:

Phase I archival background research and archeological investigations were conducted in a downtown area of Lonaconing, MD to be affected by streetscape improvements. Based on that research, Phase III data recovery was recommended in areas where replacement of curbs and sidewalks, drainage improvements, and milling and resurfacing existing roadways and shoulders within to Lonaconing historic district (AL-VI-B-113) would significantly impact the underlying historic deposits. Attempting to reconstruct the historic streetscape that existed prior to a major fire in 1881 (of which there are no extant plans) was a major justification for the data recovery project.

MAC Accession: 2001.022

### Project Objectives:

-Recover physical evidence of the pre-fire organization of the streetscape.

-Document any variations in the physical evidence that might suggest architectural prototypes related to ethnicity.

-Document any variations in the physical evidence that might suggest socioeconomic distinctions within the community.

-Recover a significant sample of kitchen ceramics and compare the assemblage to what has been stated in local history documents about local "table sets".

-Assess how artifact assemblages relating to the fire compare to contemporaneous assemblages from other late 19th century working class sites.

-Assess whether artifact assemblages from different properties reflect more or less uniformity than artifacts from assemblages that came from sites that were not part of company towns (as 19th century Lonaconing was).

## Research Potential:
